

# Somaliland food insecurity

## Outlook February - June 2018 by livelihood zone

Map created: 20 March 218

### Northwestern Agropastoral:

Likely below average Gu rainfall and below crop establishment. Increased local cereal prices. Lack of cereal stock availability. Further deterioration of pastureland, water and milk availability during Jilaal dry season.

### West Golis Pastoral:

Likely below average Gu rainfall. Reduced milk availability for consumption during Jilaal dry season. Increased local cereal prices. Deteriorated pasture and livestock.

### Guban Pasoral:

Further deterioration of pasture condition. Deteriorated livestock condition during Jilaal dry season with high fatality rates among livestock. Limited number of sellable animals. Increased debt levels (food on loan).

### East Golis Pastoral:

Likely below average Gu rainfall. Deterioration of pasture, access to water, conditions and availability of milk during dry Jilaal season. Limited sellable animals. Likely increased trend of debt level (food on loan).

### Togdheer Agropastoral:

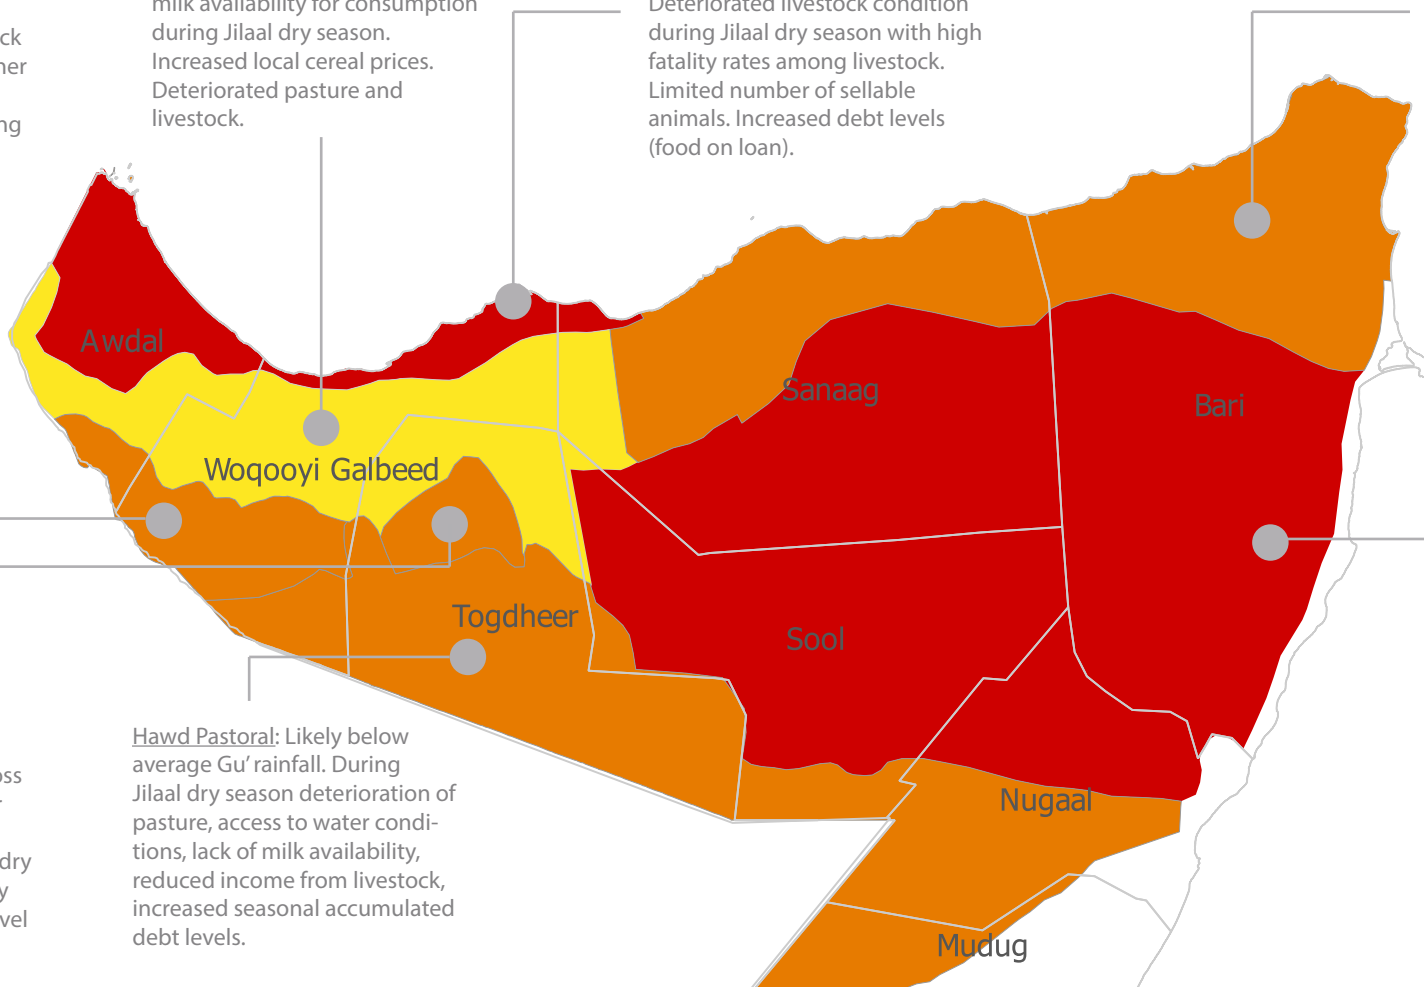

Likely below average Gu rainfall. Below average crop establishment. Lack of cereal stock across all population groups. Further deterioration of pasture and water conditions during Jilaal dry season. Lack of milk availability for consumption. High debt level (food on loan).

### Hawd Pastoral:

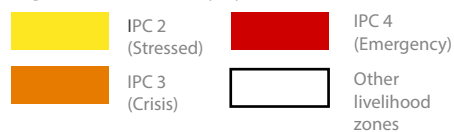

Likely below average Gu rainfall. During Jilaal dry season deterioration of pasture, access to water conditions, lack of milk availability, reduced income from livestock, increased seasonal accumulated debt levels.

### Northern Inland Pastoral:

Likely below average Gu rainfall and very high malnutrition levels. Deterioration pasture, access to water, livestock conditions. Lack of milk and limited sellable animals during Jilaal dry season. High indebtedness (water and food on loan). Presence of high pastoral destitution.
