

Rapid Response Role Profile

Job Title	Health Coordinator
Classification Level	
Immediate Supervisor's Title	Deputy Operations Manager/ Operations Manager
Number of Direct Reports (if applicable)	
Number of Indirect Reports (if applicable)	

Organizational context (where the job is located in the Organization)

The International Federation of Red Cross and Red Crescent Societies (IFRC) is the world's largest volunteer-based humanitarian network. IFRC is a membership organisation established by and comprised of its member National Red Cross and Red Crescent Societies. Along with National Societies and the International Committee of the Red Cross (ICRC), the IFRC is part of the International Red Cross and Red Crescent Movement. IFRC's headquarters is in Geneva, with regional and country offices throughout the world.

Due to the nature of emergency response operations, this role profile is an outline of the likely responsibilities applicable to Health Coordinator, deployed in a Federation co-ordinated operation. They are complementary to and should be read in conjunction with the specific tasks elaborated in the Deployment Order / Terms of Reference.

Job purpose

Health Coordinators deploy in response to disasters (including disease outbreaks) and crises around the globe as part of IFRC emergency response. The Health Coordinator, under the management of the Head of Emergency operations (HEOps/Ops Manager), will work in collaboration with other Movement Partners, delegates, national staff and volunteers, local health authorities and affected communities as part of a team within the mandate of the International Federation of the Red Cross and Red Crescent Societies (IFRC).

In support of the IFRC operation, the Health Coordinator guides and develops the overarching emergency plan of action and implementation of clinical and public health activities. This must build on evidence, best practices, solid understanding and participation of local communities, the changing external humanitarian context and the interests and capacities of the host National Society and internal and external stakeholders. The Health Coordinator works closely with the Head of Operations / Operations Manager to set up the necessary steps for guaranteeing that health considerations and needs are met in the immediate response through high quality, effective and appropriate clinical and public health interventions. This includes direct support to health programming implementation that builds upon health system and National Society capacities, and accountability to affected populations.

Role (Job Requirements)

Job duties and responsibilities

The Health Coordinator profile is responsible for assessing, coordinating and overseeing quality implementation of all IFRC clinical and public health interventions in response to emergencies, in conjunction with the host Red Cross Red Crescent National Society health department. In large-scale emergency responses, the Health Coordinator is responsible for leading the overall health strategy and may directly supervise the medical and public health in emergencies coordinators, if applicable.

1. Coordinate and communicate with local government and partners, and other humanitarian agencies to ensure effective rapid assessment, along with a holistic approach to health that prevents gaps and/or duplication in services.
2. Ensure evidence, best practices and core standards are applied to all levels of emergency health programming, to ensure quality of services
3. Advocate for the role of the Red Cross Red Crescent in health response
4. Ensure IFRC emergency health programming aligns with and considers the needs, capacities, strengths and limitations of the host National Society, while meeting humanitarian needs
5. Assess the health needs of communities affected by outbreak, disaster or crisis

6. Establish, manage and/or support health interventions, including clinical service provision, health promotion, and disease prevention interventions
7. Manage and/or support collection and proper use of Red Cross Red Crescent Health Information System (RCHIS) and other necessary health information management systems, interpretation and application to programming to ensure timely and appropriate health interventions
8. Work with local counterparts and Information Management colleagues to establish secure and confidential data management systems.
9. Support and coordinate clinical and/or public health ERUs deployed to implement health response. This could include assessment, deployment and installation support for health ERUs; supervision; mentoring; and training.
10. Take a strategic approach to health intervention design to successfully plan for and incorporate transitions to early recovery/long term recovery and exit.
11. Act as technical advisor in matters of clinical and public health needs and implementation as part of emergency response management and ensure links to relevant IFRC structures.
12. Ensure health interventions are complementary to and/or feed into the broader health system, including IFRC coordination between IFRC health and WASH ERUs.
13. Liaise regularly with the community through local health committees and seek feedback on the community's perception of health services, promoting community involvement in all aspects of health programming
14. Take a capacity building approach to work, providing training, technical support, mentoring and dissemination as part of emergency response and recovery activities.
15. Reinforce, when possible and appropriate, the capacity of the National Society and/or its volunteers.

Duties applicable to all staff

1.	Actively work towards the achievement of the Federation Secretariat's goals
2.	Abide by and work in accordance with the Red Cross and Red Crescent principles
3.	Perform any other work-related duties and responsibilities that may be assigned by the line manager
